Title of Presentation: CSP 1013 and TECH 1001 Assessment for Fall 2020

Abstract:

We are assessing the sections of CSP 1013 (Principles of Collegiate Success) and TECH 1001 (Orientation to the University) from the Fall 2020 semester by establishing learning and developmental outcomes to assignments related to two chapters that were taught. We are tracking overall grades for the assignments to determine the effectiveness of the material. For this assessment project, we are focusing on the following outcomes:

- Display successful time and life management skills
- Demonstrate effective study, note-taking, reading, and test taking skills

We tracked various assignments based on what the instructor for each section deemed fitting.

To do this, we have collected data from the Blackboard shells for these sections and have recorded the information in Excel spreadsheets, where we are currently in the process of analyzing and interpreting that data.
